#### **DETAILED ACTION**

### Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the *cogs* must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/728,474 Page 3

Art Unit: 3724

# Claim Objections

2. Claims 4 and 5 are objected to because of the following informalities: Claims 4 and 6 are duplicate that depend from the same claim 1. Appropriate correction is required.

# Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2 and 3, it is not clear what structure cited to identify the apparatus. Claims look more like a method of producing the apparatus, instead of, apparatus.

## Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-4, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyle (1592073).

Boyle discloses (Fig. 1-4) the invention including a first semi-spherical part 15, a hollowed-out circular hole (see Fig. 3), blades 21, a second semi-spherical part 14, means for mounting the second part/pivot pins 18, a first operating lever 13 and a second operating lever 12. Also, regarding claims 2 and 3, Boyle's device is capable of being formed by the method of splitting a spherical part and hollowing its interior.

# Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Boyle (1592073).

Boyle discloses (Fig. 1-4) the invention substantially as claimed except the parts are semi-spherical instead of semi-elliptical. Of course, Boyle's semi-spherical parts match the spherical shape of the grapefruit being cored. However, there are numerous fruits that need to be cored that are elliptical, for example, the mango. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Boyle's device by making the semi-spherical part semi-elliptical in order to utilize the device on elliptical fruit.

9. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Boyle (1592073) in view of Rinaldi (6473969 B2).

Boyer discloses (Fig. 1-4) the invention substantially as claimed except for a spring.

However, Rinaldi teaches the use of spring 10 for the purpose of returning the handles to the initial position. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Boyer's device by providing the spring as taught by Rinaldi in order to return the handles to the initial position.

### Allowable Subject Matter

10. Claims 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jolidon, Steinman, Fowler, Linden and Nelson are cited to show related device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Flores-Sánchez whose telephone number is 703-308-0167. The examiner can normally be reached on 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
